

Caravan and Motor Home Antenna - Model RV-85A

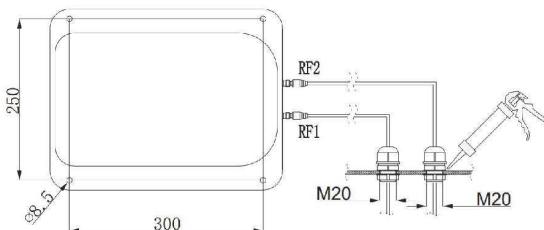

Quick Start Guide

1. Select a location for the ODU

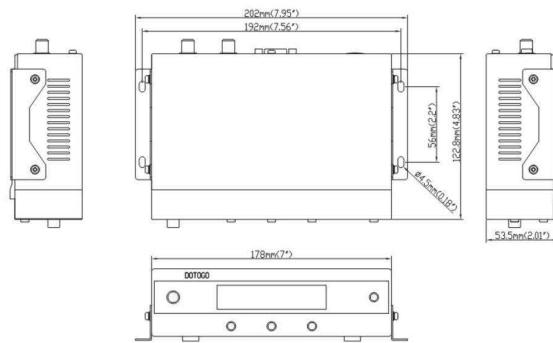

- Pick an area on the roof of your mobile home that will allow the ODU to be mounted as flat and level and strong as possible. With good support that will permit the dish, once fitted and raised, to have a full 360 degree rotation and elevation range.
- Mind the direction of Travel

2. Mount the ODU

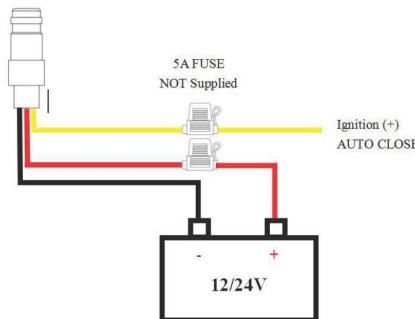

- Drill the mounting holes and cable access hole to prepare the site for installation.
- Ensure that all screw fixings are covered with sealant to ensure that there are no leaks into the RV.

3. Mount the IDU

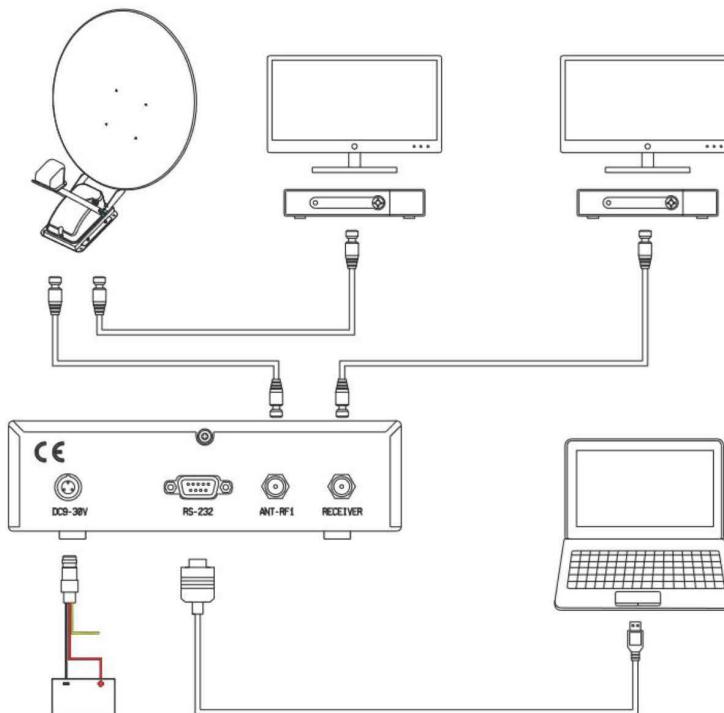

- Dry place is required for IDU to be mounted
- Drill the mounting holes prepare the site for installation.

4. Power cable

- Red : Positive of battery(VBAT+)
 Black : Cathode of battery(VBAT-)
 Yellow : Ignition(+)
